

CBRE Global Workplace Solutions | Life Sciences Group

CALIBRATION MANAGEMENT & METROLOGY SERVICES

Partner with our certified team to optimize your lab instruments and manage assets

CBRE offers in-lab and on-site ISO/IEC 17025 accredited calibrations, consulting services, customized gage programs, and calibration database services.

Metrology Services

CBRE maintains a state-of-the-art metrology laboratory to deliver unparalleled mail-in service, with typically a 3-5 day turnaround. We have trained and certified metrologists located near you and can provide on-site calibration for most of your measurement and process equipment. In addition, we can supply on-site and in-lab dimensional inspection services to verify your fixtures or to perform part layouts.

We also offer staffing solutions to supplement your in-house quality inspection organization. We can assist your staff in getting through those busy times and to help achieve 100% compliance.

Metrology Consulting

CBRE maintains a state-of-the-art metrology laboratory to offer unparalleled service. With trained and certified metrologists located near you, we can provide onsite calibrations for most of your measurement and process equipment. Our consulting resources provide proven strategies for corporations spanning a wide variety of industries. Let our experienced metrologists assist you in your certification maintenance process. CBRE can counsel your engineering and quality staff in measurement methodologies and insights into 'best practices'.

Calibration Capabilities

CBRE offers calibration services for a wide range of test and measurement equipment. The following is a representative listing of the general equipment types that can be calibrated by our facilities.

- Anemometers
- Chart Recorders
- Gage Blocks
- Height Gages
- Inspection Light Booths
- Multimeters
- pH/Conductivity
- Pressure Gages
- Tachometers
- Thermocouples
- Thread Plugs
- Torque Wrenches
- Calipers
- Dimensional Inspection
- Hardness Testers
- Hygrometers
- Micrometers
- Oscilloscopes
- Pin Gages
- Surface Plates
- Temperature Controllers
- Thermometers
- Timers/Stop Watches
- Weigh Scales

Recalibration Notices

As part of our service, we notify you in advance of equipment that is coming due for recertification. This lets you schedule your calibrations and any equipment downtime well in advance.

Traceable Calibrations

All calibrations are performed by CBRE, in our laboratory or at your facility, are fully traceable to the National Institute of Standards and Technology. For every calibration, we can provide a Certificate of Calibration proving that traceability.

Our calibrations meet the stringent requirements of ISO, DOD, EPA, FDA, NRC, and other regulatory agencies. We supply all before and after data, readings of the calibration environment, and all associated measurement uncertainties.

Turnkey Calibration Programs

Undergoing an ISO, FDA, or other regulatory audit? CBRE offers customized turnkey gage management programs to assist in attaining your quality goals and passing your quality systems audits.

We can manage every aspect of the calibration for your entire facility. Our programs are designed around your requirements. We can provide all required documentation and procedures and are present during your audits for presentations to the assessors.

CBRE can perform an on-site inventory of your measurement and process equipment and make recommendations as to calibration requirements and recall intervals.

Calibration Database Management

CBRE's FDA complaint metrology application allows customers 24/7 web access to their equipment information and offers a truly paperless system for management of equipment calibration data. In addition, it offers a safe and secure off-site archive of your calibration history and allows for customized searching and reporting.

Customer Satisfaction

Our goal is to continually exceed the increasing expectations of our customers through improvement in quality, service, and productivity. This is accomplished through the efforts of local offices in most major cities in North America. These branch offices are your link to our collective expertise, technology, and financial strength. We are consultants and suppliers, but more importantly, we are problem solvers. Our network of offices will do whatever it takes to keep your facility running smoothly, so you spend more time managing your business.
