UNRIVALED LOCATION

The HUB @ Ontario International Airport represents the "Best in Class" industrial development in Southern California. Under a long term ground lease with the Ontario International Airport Authority, this **premier state of the art 9-building 4.3M SF** industrial logistics project will offer buildings for lease ranging in size from 200,000 SF – 930,000 SF.

Immediately adjacent to the Ontario International Airport, situated between the intersection of 3 major highways including the I-10 and I-15, and less than 45 miles from the LA/LB port complex, **the location is unrivaled** in its ability to move goods from **Southern California and beyond**.

ADVANCING SUSTAINABILITY THROUGH CONCRETE INNOVATION

COMMITTING TO A SUSTAINABLE GREEN FUTURE

- Improving an existing concrete construction technology that significantly addresses **decarbonization** targets.
- Reduces the concrete embodied concrete intensity and net carbon footprint, which the **concrete process and uses account for up to 9% of global greenhouse gases emissions**.
- Dramatically reduce the carbon CO2 emissions by **35%**, while exceeding the concrete durability and strengths found in conventional concrete used in today's logistics facilities.
- **As validated by expert third party consultants, this advanced concrete design for the HUB results in an estimated 88.0M lbs. avoided of embodied concrete carbon emissions which is equivalent to**:
    - **47,000 acres of forest per year to store carbon**
    - **103.0M miles less driven by fossil fuel sourced autos and trucks**
    - **3.9M gallons of less fuel used.**

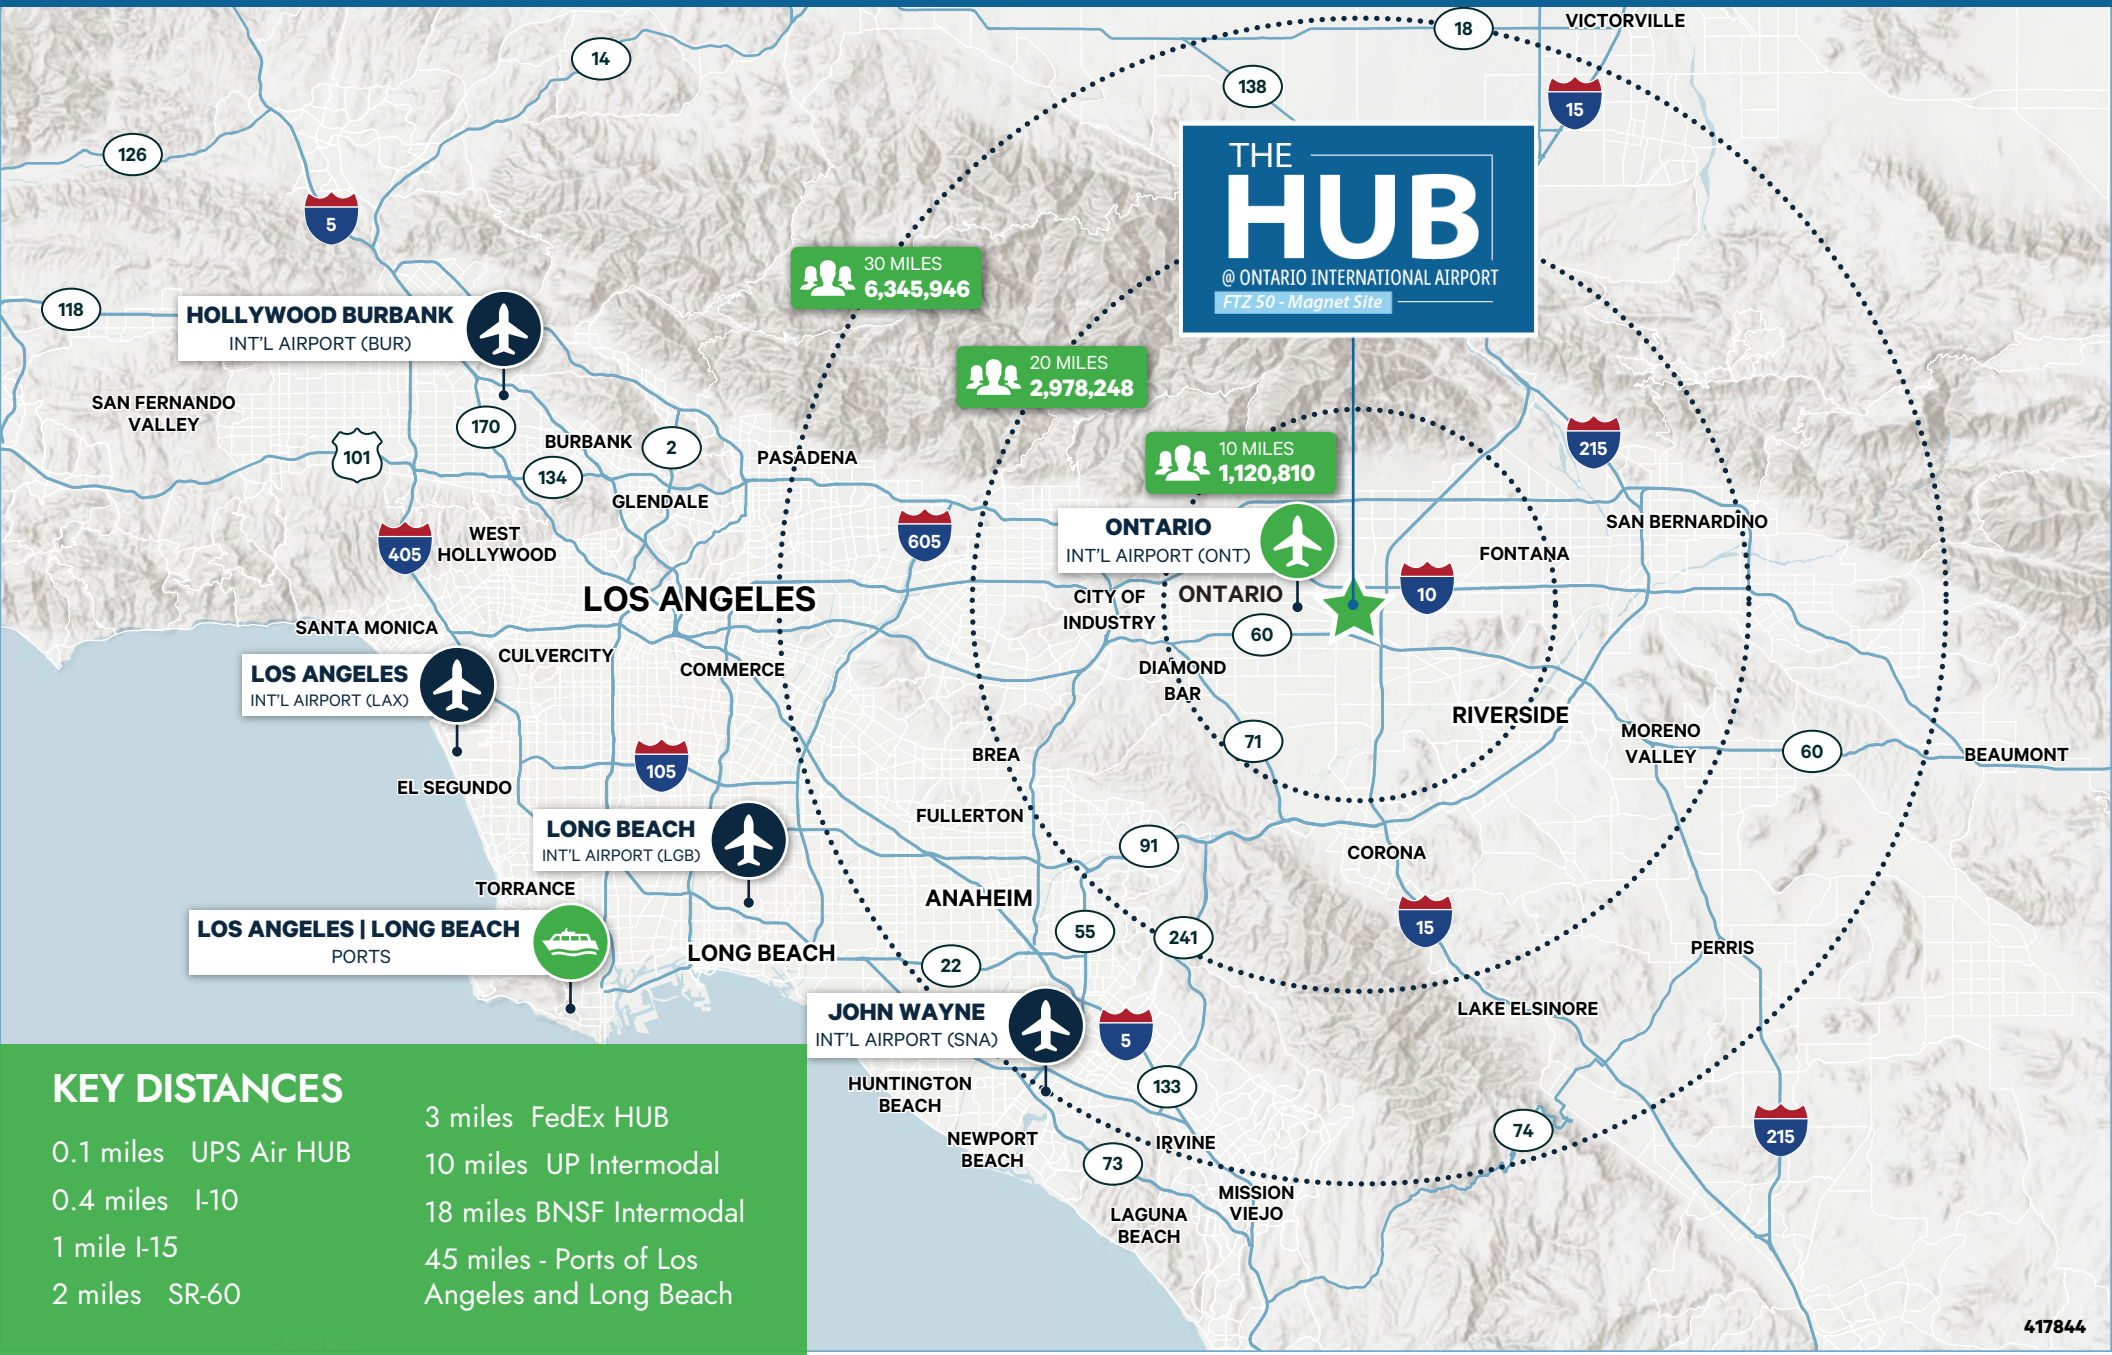

A few key points with respect to this exciting new decarbonization result in concrete technology are:

- Revised concrete raw materials and mix design which reduces amount of concrete
- Slower concrete curing time results in sequestration of carbon
- Hi density foam integrated into wall panel section design to reduce concrete
- 50% Reduction of steel re- bar used in concrete wall panels
